| 4           |                 |         |
| 5           |                 |         |
| 6           |                 |         |
| 7           |                 |         |
| 9           |                 |         |
| 11          |                 |         |
| 15          |                 |         |
| 19          |                 |         |
| 20          |                 |         |
| 22          |                 |         |
| 24          |                 |         |
| 27          |                 |         |
| 31          |                 |         |
| 33          |                 |         |
| 34          |                 |         |
| 36          |                 |         |
| 37          |                 |         |
| 39          |                 |         |
| 40          |                 |         |

## Down

| # in Puzzle | Name of Concept | Example |
|-------------|-----------------|---------|
| 1           |                 |         |
| 2           |                 |         |
| 3           |                 |         |
| 4           |                 |         |
| 8           |                 |         |
| 10          |                 |         |
| 12          |                 |         |
| 13          |                 |         |
| 14          |                 |         |
| 16          |                 |         |
| 17          |                 |         |
| 18          |                 |         |
| 21          |                 |         |
| 23          |                 |         |
| 25          |                 |         |
| 26          |                 |         |
| 28          |                 |         |
| 29          |                 |         |
| 30          |                 |         |
| 32          |                 |         |
| 35          |                 |         |
| 38          |                 |         |
